Asgardia Eclipse Extravaganza

On the 8th of April 2024 a group of Asgardians will be converging in a recreational area within the township of Sunnyvale in the great state of Texas within the United States of America. Their goal is to witness a once of a lifetime event of a total Lunar/Solar

eclipse and share in this magical experience with fellow Asgardians, friends, family and guest. This Eclipse party is truly transformational and will excite any explorer. All are welcome to join us and have a truly amazing experience.

“This is truly an astonishing event for Asgardia, I am absolutely pleased to be coming to participant in this once of a lifetime event for Asgardia”

-Lembit Opik

*Chair of Parliament

- Asgardia Moon Landing

Asgardia Moon Landing

Yes, that is correct. Asgardia will be landing on the moon. A digital copy of what Asgardia symbolizes will be part of an upcoming moon landing. As a bonus, Asgardia's animated character Raydin will also be making his first appearance on the moon. Asgardians have also been adding their DNA and other items to be part of this mission. Lifeship has partnered with Asgardia to make DNA and digital data available

at a discounted price for anyone who uses www.Asgardia.trade to acquire these items for this mission. The Blue Ghost Mission 1 (TO 19D) is a lunar lander designed to deliver ten payloads to the lunar surface in 2024. The mission aims to investigate heat flow from the lunar interior, plume-surface interactions, and crustal electric and magnetic fields. It will also take X-ray images of the Earth's magnetosphere. Technology tests include regolith sampling, regolith adherence, Global Navigation Satellite System abilities, radiation tolerant computing, and dust mitigation using electrodynamic fields. Blue Ghost Mission 1 was selected through NASA's Commercial Lunar Payload Services (CLPS) initiative, in which NASA contracts with a commercial partner, Firefly Aerospace, that provides the launch and lander. Additionally, Lifeship has partnered with Firefly to add DNA and data moon storage, where these collections will have their permanent residence at Mare Crisium. The launch will be in a SpaceX Falcon 9 rocket from Cape Canaveral, Florida, sometime in the latter half of 2024.

If you visit www.Asgardia.trade to get your DNA or DATA packages, from the home page, go to registered businesses in Asgardia. Scan down and find Lifeship; click on the missions-tap and follow the instructions. Do not miss out on this once-in-a-lifetime event of sending either data or DNA to the moon.
